

Product Details

GV6247 Trapped Shower Gully with Vertical Outlet

Technical Data

Dimensions:

160 dia. at finish level
220 dia. body
4 - grating aperture width
103 - Height below Body Flange

Connection - 110mm Plastic, 100mm DIN19522 / SML / 4" BS416 & 50mm (2") solvent weld plastic socket

Free Area - 14cm²

Materials - Grating, clamping collar - stainless steel; Body, dip tube, bucket - plastic (ABS)

Load Rating Class - K3

Weight - 1 kg

General Description:

160 Dia. Stainless Steel Trapped Shower Gully with Vertical Outlet, for use with flexible sheet floor covering (eg. vinyl) (110mm spigot outlet. A reducer is supplied for connection to 50mm pipework.), with 110.2, 2" Socket BS 5255 dia. vertical outlet. A compact, lightweight, trapped gully for use in security shower areas decked with flexible sheet floor covering such as vinyl, up to 3.5mm thickness; supplied with Pin Torx security screws.

Materials:

ABS: Used for bodies, dip tubes, extensions and spigot adaptors. A cost effective, fire resistant material.

Stainless Steel - Austenitic Grade 304 (Grade 316 optional on most products): Used for bodies, gratings, funnels, access covers, filter buckets and fixings. A corrosion-resistant metal containing significant amounts of nickel and chromium; AISI grade 304 stainless steel is used as standard, which is suitable for general use in and around buildings including most coastal locations. In applications such as swimming pools or having an aggressive atmosphere, grade 316 is recommended and is available optionally (if available, code 'M' will be listed under 'Options'). An even higher grade may be required for applications in highly corrosive environments including where exposure to seawater may be anticipated. Clean with soap and warm water rinse and wipe dry. Gratings may also be cleaned in certain dishwashers. Under no circumstances treat with metal scouring pads, metal scrapers or wire wool as these will contaminate surfaces leaving rust spots. Take care to cover stainless steel items when site work is going on, to avoid contamination with rust-inducing particles such as when mild steel or cast iron items are being cut.

All dimensions are in millimetres unless stated. In line with general practice all dimensions shown are nominal.
