

Product Details

L3602 Grating

Technical Data

Dimensions:

223 square at finish level
250 square overall size
23 - grating aperture width
98 - Overall Height
Connection - 4" NPSM Vari-Level thread
Free Area - 290cm²
Materials - Stainless steel
Load Rating Class - L15
Weight - 3.8 kg

General Description:

250 Square Stainless Steel Vari-Level Grating, (Anti-slip mesh for use with flexible sheet floor covering, such as vinylgrating not secured), with 4" NPSM dia. Vertical outlet with 23mm grating aperture width. For use in high specification applications including food preparation and areas where high corrosion resistance is a requirement.

Options:

To specify an option, add option letter(s) as a suffix to the Spec. Code M - grade 316 stainless steel

Materials:

Stainless Steel - Austenitic Grade 304 (Grade 316 optional on most products): Used for bodies, gratings, funnels, access covers, filter buckets and fixings. A corrosion-resistant metal containing significant amounts of nickel and chromium; AISI grade 304 stainless steel is used as standard, which is suitable for general use in and around buildings including most coastal locations. In applications such as swimming pools or having an aggressive atmosphere, grade 316 is recommended and is available optionally (if available, code 'M' will be listed under 'Options'). An even higher grade may be required for applications in highly corrosive environments including where exposure to seawater may be anticipated. Clean with soap and warm water rinse and wipe dry. Gratings may also be cleaned in certain dishwashers. Under no circumstances treat with metal scouring pads, metal scrapers or wire wool as these will contaminate surfaces leaving rust spots. Take care to cover stainless steel items when site work is going on, to avoid contamination with rust-inducing particles such as when mild steel or cast iron items are being cut.

All dimensions are in millimetres unless stated. In line with general practice all dimensions shown are nominal.
