

**Product Details**

**SD203 Sub-surface gully body**

**Technical Data**

**Dimensions:**

305 dia. body

165 - Height below Body Flange

**Connection** - 3" BS416 (75mm) / Harmer SML

**Materials** - Cast iron, lacquered

**General Description:**

Cast Iron Vari-Level Sub-surface gully body (to allow sub-surface drainage such as with cavity membranes), with 87 dia. vertical outlet. Cast iron slotted membrane clamp included

**Materials:**

**Cast Iron - BS EN 1561:** Used for bodies, membrane clamping collars, spigot adaptors and accessories such as extensions. A widely used metal in the drainage industry, its resistance to corrosion permits extended use under extreme conditions. Castings are coated with a high grade lacquer paint to provide internal and external surface coverage. Paint will gradually wear off and is replaceable; oxidation (surface rusting) is a natural process which does not weaken the material. A zinc anti-corrosion coating is applied to certain castings by sherardizing.

---

All dimensions are in millimetres unless stated. In line with general practice all dimensions shown are nominal.
