

Product Details

WC233 Outlet with Circular Dome

Technical Data

Dimensions:

220 dia. at finish level
 305 dia. body
 119 - Height below Body Flange
 80 to 100 - min/max height between roof deck and membrane level
 68 - depth body flange to outlet center line

Connection - female 3" BSP threaded connection (75mm)

Free Area - body= 44cm², grating= 410cm²

Materials - Dome - polycarbonate; Body - cast iron; Membrane Clamp - cast iron, lacquered

Load Rating Class - K3

Weight - 11.4 kg

General Description:

220 Dia. Cast Iron 3400 series (Medium Sump) Warm Roof Outlet with Circular Dome, with 3" BSP dia. horizontal outlet. For other thicknesses of insulation, please contact our Technical Services Dept.

Options:

To specify an option, add option letter(s) as a suffix to the Spec. Code

K - bonded insulation jacket

SS - stainless steel dome

Z - rigid PVC flange for use with PVC single ply membranes

Materials:

Cast Iron - BS EN 1561: Used for bodies, membrane clamping collars, spigot adaptors and accessories such as extensions. A widely used metal in the drainage industry, its resistance to corrosion permits extended use under extreme conditions. Castings are coated with a high grade lacquer paint to provide internal and external surface coverage. Paint will gradually wear off and is replaceable; oxidation (surface rusting) is a natural process which does not weaken the material. A zinc anti-corrosion coating is applied to certain castings by sherardizing.

Polycarbonate: Used for domes. A polycarbonate/ABS blend which offers durability, high impact strength and long-term resistance to ultraviolet light.

All dimensions are in millimetres unless stated. In line with general practice all dimensions shown are nominal.

Typical Installation for WC233:

Note: This illustration may show a similar Wade Product - it is intended to show the general installation type only.

Dimensioned Section for WC233:

Flow Performance Figures for WC233:

| Head of water at outlet | 15mm | 20mm | 25mm | 30mm | 35mm | 40mm | 50mm |
|--|-------------|-------------|-------------|-------------|-------------|-------------|-------------|
| Flow Rate (l/s): | 2.03 | 2.78 | 3.75 | 4.64 | 5.26 | 5.41 | 5.73 |
| Roof area drained (m²) at 0.021 l/s per m² rainfall rate: | 97 | 132 | 179 | 221 | 250 | 258 | 273 |

Note: Flow rates of Wade roof outlets have been established by full-scale tests. The values shown in the table are 75% of such tests. The design of the layout of roof outlets should be in accordance with the recommendations given in BS EN 12056:3.
