

Product Details

WC323 Outlet with Circular Flat Grating

Technical Data

Dimensions:

220 dia. at finish level
 305 dia. body
 90 - Height below Body Flange
 80 to 100 - min/max height between roof deck and membrane level

Connection - female 3" BSP threaded connection (75mm)

Free Area - body= 44cm², grating= 130cm²

Materials - Grating - ductile iron, sherardized; Body - cast iron, lacquered; Membrane Clamp - cast iron, lacquered

Load Rating Class - L15

Weight - 11.2 kg

General Description:

220 Dia. Cast Iron 3400 series (Medium Sump) Warm Roof Outlet with Circular Flat Grating, for use with asphalt / composition finish, with 3" BSP dia. vertical outlet. For other thicknesses of insulation, please contact our Technical Services Dept.

Options:

To specify an option, add option letter(s) as a suffix to the Spec. Code

K - bonded insulation jacket

Z - rigid PVC flange for use with PVC single ply membranes

Materials:

Cast Iron - BS EN 1561: Used for bodies, membrane clamping collars, spigot adaptors and accessories such as extensions. A widely used metal in the drainage industry, its resistance to corrosion permits extended use under extreme conditions. Castings are coated with a high grade lacquer paint to provide internal and external surface coverage. Paint will gradually wear off and is replaceable; oxidation (surface rusting) is a natural process which does not weaken the material. A zinc anti-corrosion coating is applied to certain castings by sherardizing.

Ductile Iron - BS EN 1563 + 1564: A casting with the ductility of steel, yet with more than twice the tensile strength of cast iron. A zinc anti-corrosion coating is applied by sherardizing.

All dimensions are in millimetres unless stated. In line with general practice all dimensions shown are nominal.

Typical Installation for WC323:

Note: This illustration may show a similar Wade Product - it is intended to show the general installation type only.

Dimensioned Section for WC323:

Flow Performance Figures for WC323:

Head of water at outlet	15mm	20mm	25mm	30mm	35mm	40mm	50mm
Flow Rate (l/s):	2.28	3.29	4.1	4.24	4.29	4.31	4.45
Roof area drained (m²) at 0.021 l/s per m² rainfall rate:	109	157	195	202	204	205	212

Note: Flow rates of Wade roof outlets have been established by full-scale tests. The values shown in the table are 75% of such tests. The design of the layout of roof outlets should be in accordance with the recommendations given in BS EN 12056:3.
