

**Product Details**

**WD704 Outlet with Square Flat Grating**

**Technical Data**

**Dimensions:**

200 square at finish level  
 305 dia. body  
 5 - grating aperture width  
 190 - Height below Body Flange  
 86 to 113 - min/max height between membrane level and top of grating

**Connection** - 4" BS416, 100mm DIN19522 / Harmer SML

**Free Area** - body= 78cm<sup>2</sup>, grating= 216cm<sup>2</sup>

**Materials** - Grating - stainless steel; Body - cast iron, lacquered; Membrane Clamp - cast iron, lacquered

**Load Rating Class** - K3

**Weight** - 11.9 kg

**General Description:**

200 Square Stainless Steel 3410 series (Medium Sump) No Fines Screenshot / Inverted Roof Outlet with Square Flat Grating, for use with unfinished (eg. bare concrete) or paved areas, with 111 dia. vertical outlet with 5mm grating aperture width .

**Options:**

To specify an option, add option letter(s) as a suffix to the Spec. Code

K - bonded insulation jacket

Z - rigid PVC flange for use with PVC single ply membranes

**Materials:**

**Cast Iron - BS EN 1561:** Used for bodies, membrane clamping collars, spigot adaptors and accessories such as extensions. A widely used metal in the drainage industry, its resistance to corrosion permits extended use under extreme conditions. Castings are coated with a high grade lacquer paint to provide internal and external surface coverage. Paint will gradually wear off and is replaceable; oxidation (surface rusting) is a natural process which does not weaken the material. A zinc anti-corrosion coating is applied to certain castings by sherardizing.

**Stainless Steel - Austenitic Grade 304 (Grade 316 optional on most products):** Used for bodies, gratings, funnels, access covers, filter buckets and fixings. A corrosion-resistant metal containing significant amounts of nickel and chromium; AISI grade 304 stainless steel is used as standard, which is suitable for general use in and around buildings including most coastal locations. In applications such as swimming pools or having an aggressive atmosphere, grade 316 is recommended and is available optionally (if available, code 'M' will be listed under 'Options'). An even higher grade may be required for applications in highly corrosive environments including where exposure to seawater may be anticipated. Clean with soap and warm water rinse and wipe dry. Gratings may also be cleaned in certain dishwashers. Under no circumstances treat with metal scouring pads, metal scrapers or wire wool as these will contaminate surfaces leaving rust spots. Take care to cover stainless steel items when site work is going on, to avoid contamination with rust-inducing particles such as when mild steel or cast iron items are being cut.

All dimensions are in millimetres unless stated. In line with general practice all dimensions shown are nominal.

**Typical Installation for WD704:**

Note: This illustration may show a similar Wade Product - it is intended to show the general installation type only.

**Dimensioned Section for WD704:**

**Flow Performance Figures for WD704:**

<b>Head of water at outlet</b>	<b>15mm</b>	<b>20mm</b>	<b>25mm</b>	<b>30mm</b>	<b>35mm</b>	<b>40mm</b>	<b>50mm</b>
<b>Flow Rate (l/s):</b>	1.97	3.09	4.04	4.77	5.05	5.25	5.84
<b>Roof area drained (m<sup>2</sup>) at 0.021 l/s per m<sup>2</sup> rainfall rate:</b>	94	147	192	227	240	250	278

**Note:** Flow rates of Wade roof outlets have been established by full-scale tests. The values shown in the table are 75% of such tests. The design of the layout of roof outlets should be in accordance with the recommendations given in BS EN 12056:3.
