K3202 Overflow Standpipe

Technical Data

Dimensions:

120 dia. at finish level
50 - height of frame
100 to 1200 - available standpipe length range specify in 10mm increments

Connection - 4" NPSM Vari-Level thread

Materials - Standpipe - stainless steel; Collar - PVC

Weight - 1.8 kg

General Description:

Vari-Level Overflow Standpipe (With cap) , with 4" NPSM dia. vertical outlet. For use in decorative pools and similar locations. The stainless steel standpipe is easily removed for pool drainage.

Materials:

PVC: Used for standpipe and selected pipework adaptors. A cost effective, fire resistant material.

Stainless Steel - Austenitic Grade 304 (Grade 316 optional on most products): Used for bodies, gratings, funnels, access covers, filter buckets and fixings. A corrosion-resistant metal containing significant amounts of nickel and chromium; AISI grade 304 stainless steel is used as standard, which is suitable for general use in and around buildings including most coastal locations. In applications such as swimming pools or having an aggressive atmosphere, grade 316 is recommended and is available optionally (if available, code 'M' will be listed under 'Options'). An even higher grade may be required for applications in highly corrosive environments including where exposure to seawater may be anticipated. Clean with soap and warm water rinse and wipe dry. Gratings may also be cleaned in certain dishwashers. Under no circumstances treat with metal scouring pads, metal scrapers or wire wool as these will contaminate surfaces leaving rust spots. Take care to cover stainless steel items when site work is going on, to avoid contamination with rust-inducing particles such as when mild steel or cast iron items are being cut.

All dimensions are in millimetres unless stated. In line with general practice all dimensions shown are nominal.
