Product Details

**WJ103 Downspout Nozzle**   **Technical Data**

Dimensions:

180 dia. overall size
144 - Length
Connection - female 3" BSP threaded connection (75mm)
Materials   - Cast gunmetal
Weight - 4.4 kg

General Description:
Gunmetal Parapet Downspout Nozzle, with 3" BSP dia. outlet. Downspout outlet with threaded inlet, designed for installation on the outside face of a parapet wall to discharge water to lower levels

Materials:
Gunmetal - BS EN 1982: Used for downspout nozzles, gratings, gunmetal gullies and non-freeze water points.A cast alloy suited to finished areas where the rich, bronze colour complements the decor. Being a non-spark material makes it particularly suited to gunmetal gullies for use in metal decks such as on oil rigs or ships.On certain products, a "mirror" finish is produced by polishing. If left alone polished bronze will gradually tarnish; to restore lustre, use metal polish and buff with a cloth. The mirror finish must not be treated with any abrasive cleaning material otherwise the surface will be permanently scratched.On other products, a satin finish with a fine grain effect is used which blends well with most floor finishes. The satin finish is generally maintained by the slight abrasive action of passing traffic. In unused areas the material will gradually tarnish. To restore lustre, apply a plain nylon scouring pad (not soap-filled) in the direction of grain.

All dimensions are in millimetres unless stated. In line with general practice all dimensions shown are nominal.
