

Product Details

SN11230 Channel Grating

Technical Data

Dimensions:

60 x 500 overall size

10 - grating aperture width

15 - Depth

Free Area - 172 per metre

Materials - Nickel bronze

Load Rating Class - B125

Weight - 2 kg

General Description:

60 wide x 500 long Nickel Bronze Standard Slot Channel Grating with 10mm grating aperture width . Durable high quality gratings particularly suited to areas subject to high volume of pedestrian traffic. CE marked and type tested to BS EN 1433.

Materials:

Nickel Bronze - BS EN 1982: Used with satin finish for gratings, funnels and access covers. A cast alloy with a fine grain effect which blends well with most floor finishes. The satin finish is generally maintained by the slight abrasive action of passing traffic. In unused areas the material will gradually tarnish. To restore lustre, apply a plain nylon scouring pad (not soap-filled) in the direction of grain. **Note: Avoid covering nickel bronze items with plastic sheeting after installation, otherwise blackening may occur.**

All dimensions are in millimetres unless stated. In line with general practice all dimensions shown are nominal.
